

Skills 101

Toad for SQL Server, Toad Data Point & Data Studio with AI Insights

 Quest

Denis O'Sullivan
Systems Consultant
denis.osullivan@quest.com

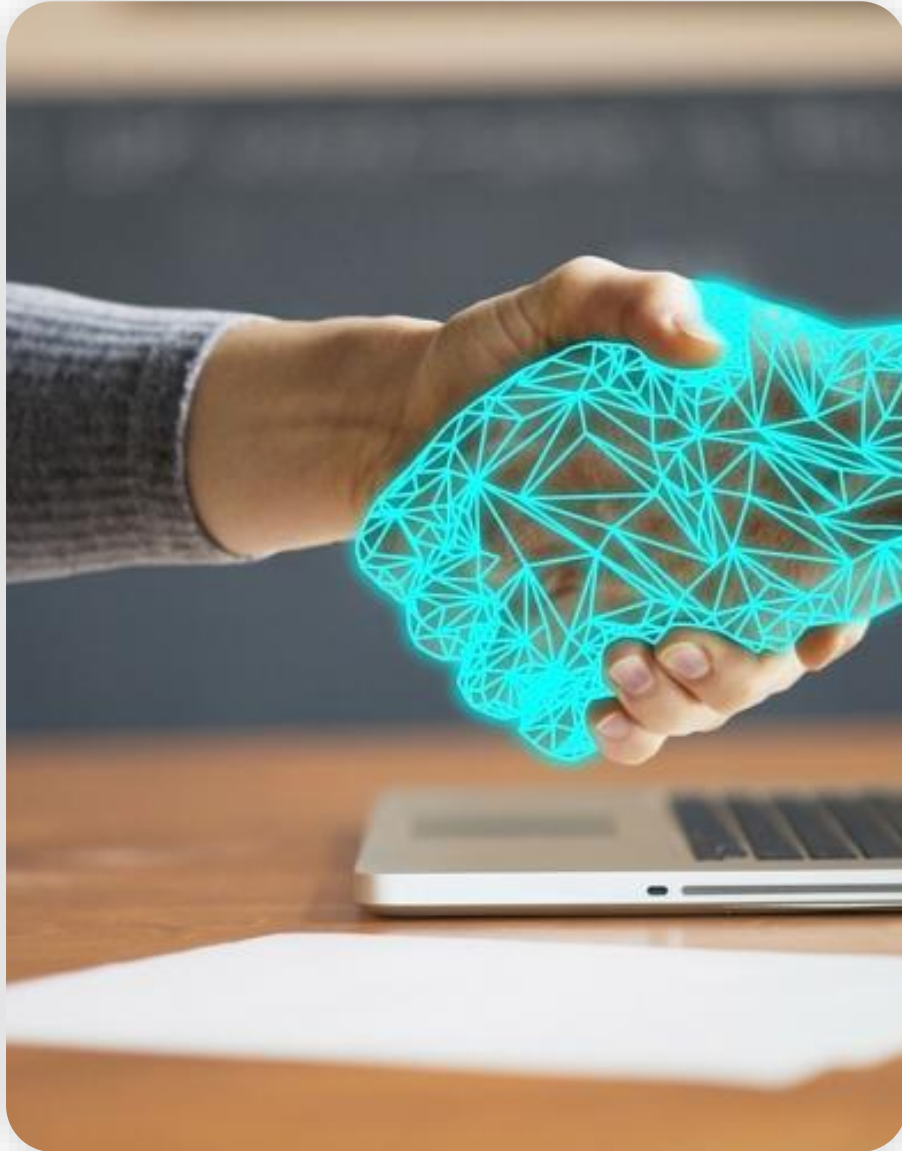

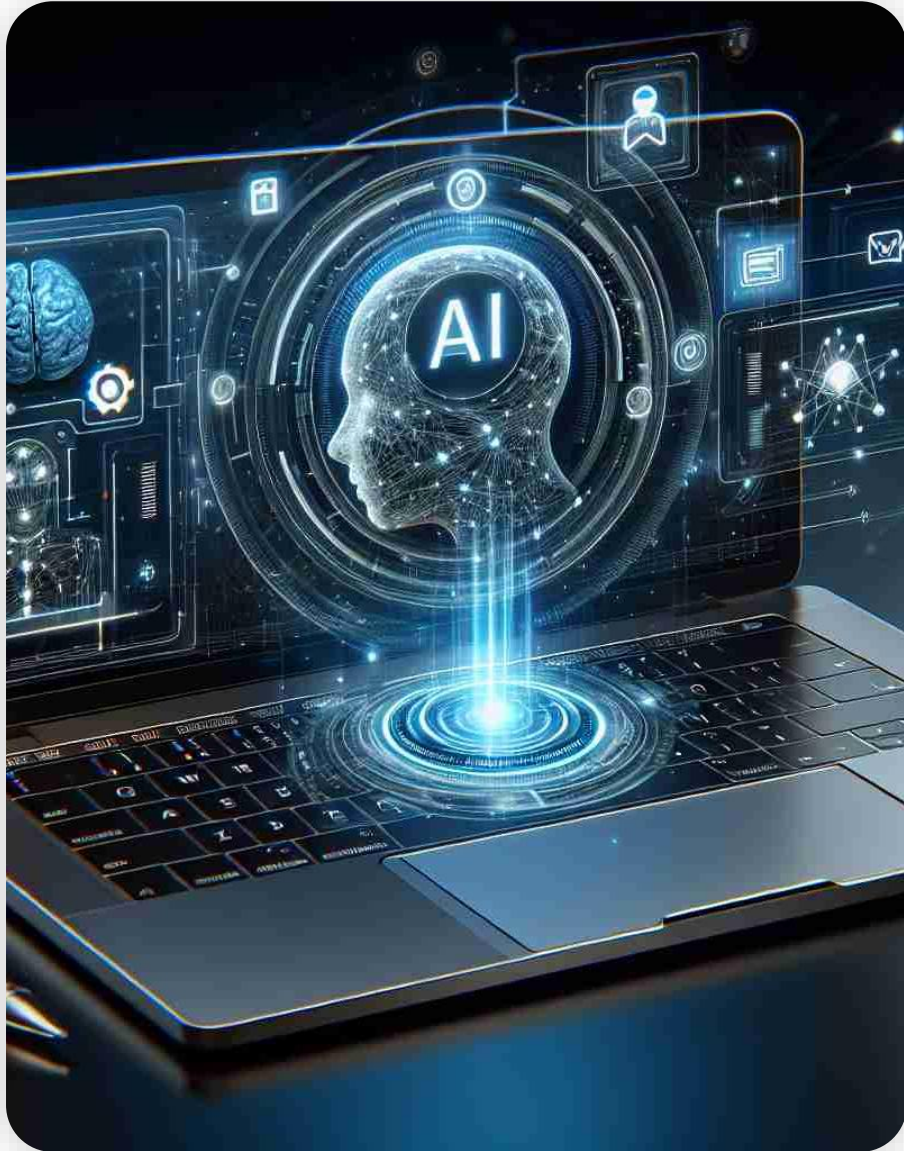

What are AI Insights?

- AI Explain
- AI Validate
- AI Optimize
- AI Educate
- AI Ask (*TDP only*)
- AI Code (*via GitHub Copilot in Toad products*)

Why AI matters in Toad

- **Reduce pressure on teams who are:**
 - Working across more platforms
 - Writing more code
 - Supporting environments with fewer DB experts
- **Bring AI into the workflow** (where the work actually happens)
- **Help teams move faster, understand more, and reduce risk** (*without replacing them*)

What you need to get started

To use AI Insights, you'll need:

- Additional per user license
- Available with subscription licenses only
- Internet connection required on the Toad client

Let's see it in action

How AI Insights works inside Toad
