

Coexistence Manager for Notes

Ensure Notes and Exchange coexistence and minimize risks

Keeping IBM® Notes® and Microsoft® Exchange Server users collaborating during a migration or sustained coexistence period is essential for maintaining business operations and efficiency. Without a third-party coexistence solution, Notes and Exchange users do not share a common directory, free/busy lookups are inaccessible across platforms, mail and calendar data will not translate properly, and business productivity is disrupted — all of which hurts your revenue. Other solutions on the market may not scale to the size of your organization and must store historical data within a new Domino® database at a time

when your organization is moving in another direction.

Coexistence Manager for Notes ensures seamless collaboration between Notes and Exchange in order to maintain business productivity throughout the coexistence period. You'll be able to sync Notes and Exchange directories (users, groups and resources) to preserve user collaboration while also enabling free/busy queries between platforms. You can also maintain the fidelity of your email and calendar data, including recurring meetings and active mail, in order to mitigate the risk of lost or delayed operations.

BENEFITS:

- Maintains business productivity by enabling Notes and Exchange users to collaborate, share a common directory, view free/busy information and schedule meetings throughout the coexistence period
- Ensures the accuracy of email and calendar data as it is sent between Notes and Exchange
- Processes active mail without storing content on Domino databases
- Scales for migrations of any size
- Is backed by an experienced vendor with a track record of successful migrations and 24x7 global support

Coexistence Manager for Notes enables Notes and Exchange users to collaborate, view free/busy information, schedule meetings and more.

"We felt extremely confident using Coexistence Manager for Notes and Migrator for Notes to Exchange, and managed to finish our migration two months ahead of schedule. By using these products, we migrated email with 100 percent accuracy, and our users were able to collaborate and schedule meetings with each other, no matter which platform their mailbox resided on."

Mary Morabito, project manager for technical services,
Coca-Cola Bottling Co. Consolidated

SYSTEM REQUIREMENTS

DOMINO SERVER

Domino version 6.5.1–6.5.6, 7.0.0–7.0.4, 8.0.0–8.0.2, 8.5.0–8.5.3 or 9.0.1

EXCHANGE SERVER

Exchange 2016, Exchange 2013 (SP0 or SP1), 2010 (SP0, SP1, SP2 or SP3), 2007 (SP0, SP1, SP2 or SP3) or 2003

NOTES END-USER WORKSTATION

Notes client version 6.5.1–6.5.6, 7.0.0–7.0.4, 8.0.0–8.0.2, 8.5.0–8.5.3 or 9.0.1

Outlook client version 2016 or older, or Outlook Web Access 2007, 2010 or 2013

Note: This list shows only the most basic requirements. For a complete list of system requirements, please visit quest.com/products/coexistence-manager-for-notes.

FEATURES

Active mail processing — Provide Exchange users with access to advanced formatting and live Notes content from within their Outlook® client. This functionality includes encryption, embedded buttons, hotspots, collapsible sections and tabbed tables. Without Coexistence Manager for Notes, active mail features are not viewable or actionable in Outlook, prohibiting true coexistence.

No need for Domino databases — Process active mail without storing content on Domino databases, eliminating setup, access control and maintenance of additional Domino databases during the coexistence period.

Scalability — Deploy multiple instances of Coexistence Manager for Notes to increase scalability, as well as improve load balancing and failover.

Directory synchronization — Synchronize directories between Notes and Exchange 2016 and older, enabling users to view a common list of users, groups and resources, no matter where their mailboxes reside.

Free/busy connection — Provide free/busy queries between Notes and Exchange 2016 and older, Office 365®

and hosted Exchange, enabling users to schedule meetings and view coworkers' availability, no matter where their mailboxes reside.

Calendar sharing — Ensure that custom and recurring calendar invitations process accurately when sent between platforms. This enables Notes and Exchange users to collaborate and schedule meetings, no matter where their mailboxes reside.

Link tracking — Ensure that embedded email links to Notes documents continue to be routed correctly throughout the coexistence period, preserving business productivity.

ABOUT QUEST SOFTWARE

Quest Software creates technology and solutions that build the foundation for enterprise AI. Focused on data management and governance, cybersecurity and platform modernization, Quest helps organizations address their most pressing challenges and make the promise of AI a reality. Around the globe, more than 45,000 companies including over 90% of the Fortune 500 count on Quest Software. For more information, visit www.quest.com or follow Quest Software
