

Directory Sync Pro

Quest Directory Sync Pro sets up and maintains a sync between multiple systems. It can sync Active Directory forests or Active Directory and Domino Directory. Now, users in merging organizations can find each other in a shared address book. With Directory Sync Pro, you can efficiently sync all mail-enabled objects, including users, contacts, mail groups, distribution lists, databases, shared mailboxes, rooms, and resources.

FEATURES

- Sync mail-enabled objects between environments for better collaboration and productivity
- Sync between Active Directory forests
- AD attribute data transformation with overrides and custom mappings
- Sync passwords and/or SID History
- Policy Enable/Disable target MEUs
- Restructure AD without end-user impacts
- On-premises install for cloud sensitive scenarios
- Multi-node setup available for redundancy
- Browser based UI for remote administration

Benefits:

- Establish Day One collaboration
- 'What if?' dry-run Sync Report
- Reduce risk by testing with environments which mimic production
- Unified Global Address List, calendar free/busy, and cross-forest delegation Sync
- Don't interrupt end users

NOTES

- Professional Services available
- SSL certificate recommended
- Access to source DC holding the PDC Emulator AD FSMO role required for SID History migration

SYSTEM REQUIREMENTS

Operating Systems

- Windows Server 2022, 2019 or 2016

Minimum Hardware Requirements

- 6 GB RAM
- 11 GB disk

SQL Requirements

- SQL Server Management Studio 2022, 2019, 2017 and 2016

Supported Domain/Forest Functional Levels

- 2003 through current version

General Requirements

- .NET 4.8 Framework
- Read/write domain controller access for each domain
- BtPaExec for password sync

SPECS

Synchronizations Supported

- Active Directory to/from Active Directory
- AD inter/intra forest sync
- Users, Groups, Devices, OUs, Rooms, Resources, Shared Mail and Contacts
- Sync users as contacts, mail-enabled users or disabled mail-enabled users
- Sync groups as member-populated or mail-enabled groups

Mapping

- Meet extended schema and attribute concatenation requirements
- Map attributes based on directory schema
- Create new objects or match and update existing objects
- 152 different attributes mapped by default

About Quest Software

Quest Software creates technology and solutions that build the foundation for enterprise AI. Focused on data management and governance, cybersecurity and platform modernization, Quest helps organizations address their most pressing challenges and make the promise of AI a reality. Around the globe, more than 45,000 companies including over 90% of the Fortune 500 count on Quest Software. For more information, visit www.quest.com or follow Quest Software on [X \(formerly Twitter\)](#) and [LinkedIn](#).
