

Quest Migrator Pro for Exchange

Quest Migrator Pro for Exchange automates and simplifies enterprise Exchange migrations within a current Exchange environment, to later Exchange versions or even to Microsoft 365 – including GCC High tenants. This powerful migration tool does much more than merely move mailbox data—it moves users. Quest Migrator Pro for Exchange has a powerful scheduling engine to give you total control at your fingertips, automating data collection, scheduling, reporting and user communication.

Features

- Move from older versions of Exchange to modern Exchange or even Microsoft 365
- Controls via command line or User Interface
- Constructs built-in reports
- Employs scheduling options with forecasted completion timeline
- Utilizes centralized admin features with real-time schedules
- Leverages PowerShell for maximum migration throughput
- Incorporates Public Folder migration capabilities

Specs

- Runs on Windows Technologies: Windows Server, IIS, .NET, SQL
- PowerShell Migration Engine
- Automation and scheduling
- Self Service Web Portal
- Central Administration
- Almost 100 mailbox and AD attributes with migration time estimates

Benefits:

- Migrate to newer versions of Exchange or to Office 365 to take advantage of modern servers and SaaS capabilities
- Experience a fast migration with powerful engines, all with detailed schedule capabilities to fit your migration timelines
- Migrate public folders for greater application of migration possibilities
- Enable IT to view all aspects of the migration from a centralized console, making management easier than ever
