

# What's New in erwin Data Intelligence by Quest 14

New data observability and quality discovery in erwin Data Quality and the debut of erwin Data Intelligence Cloud, a Quest-hosted offering on Microsoft Azure, top the enhancements in erwin Data Intelligence 14.

## Ensure greater data reliability with erwin Data Quality

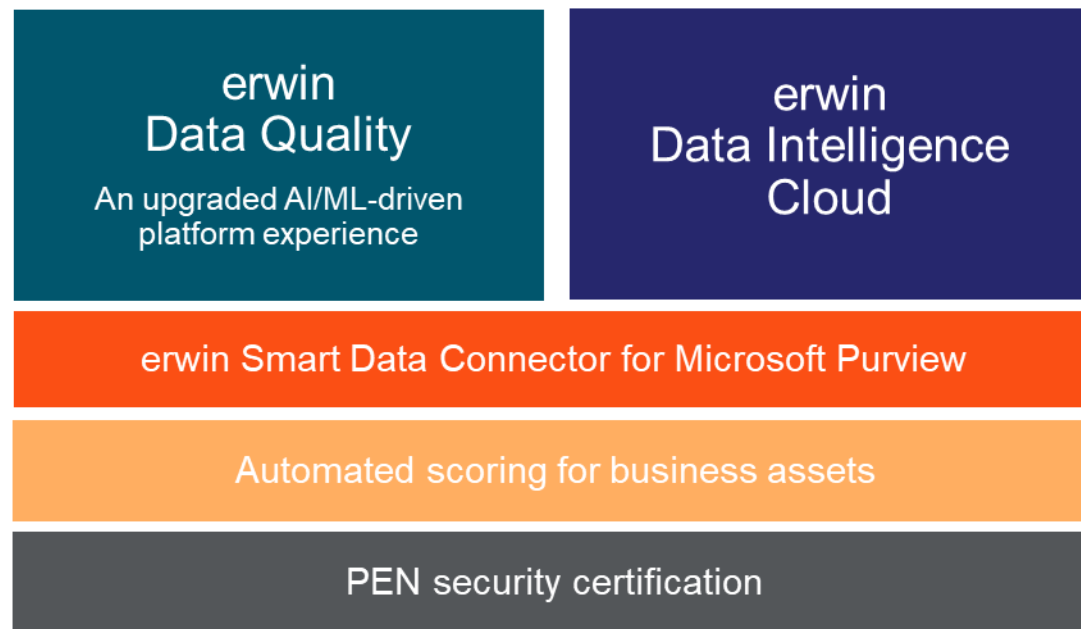

With erwin Data Intelligence 14, erwin Data Quality adds consumer-like quality discovery and cross-platform data observability to its integrated data profiling and quality scoring through an upgraded AI/ML-driven platform.

- Explore data quality via search and filtering similar to online shopping sites and gain a bird's eye view of data quality in a customizable analytics dashboard
- Leverage cross-platform data observability with no-code, advanced anomaly detection to monitor key data sources, like critical data supporting AI use, and automatically trigger alerts as data drifts beyond acceptable thresholds
- Use out-of-the-box quality measures to speed setup of observability monitoring, alerts and workflows and auto-deploy measures during data profiling
- Take advantage of the platform's self-learning capabilities to evolve quality measures in use given alert triage decisions for future monitoring efficiency
- Use built-in issue management and integrate email, Teams, Slack, JIRA or ServiceNow to extend alerts and issue workflows beyond erwin Data Quality

## A new deployment option: erwin Data Intelligence Cloud

erwin Data Intelligence is now also available as a fully-featured Quest-hosted offering on Microsoft Azure in the Azure region closest to your organization.

- Lower total cost of ownership, reduce on-prem infrastructure costs and let Quest deploy and manage your software
- Take advantage of transparent, subscription-based pricing similar in approach to other erwin Data Intelligence deployment options

## Also, in erwin Data Intelligence 14

- Use the erwin Smart Data Connector for Microsoft Purview to ingest Purview metadata into your data catalog to leverage across erwin Data Intelligence
- Take advantage of the scoring mechanism used in automated data value scoring to score business assets as well
- Be confident in Quest's commitment to security with PEN security certification of this release
- And more. View the erwin Data Intelligence 14.0 release notes for all enhancements and more detail on the [Quest Support Portal](#).
