

Migrator for Notes to Exchange

ZeroIMPACT Notes email migration

Email migrations can be complex and expensive projects that introduce tremendous risks: Downtime and data loss can disrupt end-user productivity and business operations. Ensuring a seamless transition without hurting productivity or introducing undue IT burden is critical for an on-time, on-budget and risk-free migration.

Migrator for Notes to Exchange from Quest® mitigates these risks and reduces

the burden on the migration team and help desk by providing a ZeroIMPACT migration from Domino to Office 365 and Exchange. With Quest, you'll slash costs by up to 60 percent by migrating email and calendar data more than three times faster and with superior fidelity. Stay in command with reporting, scheduling and automation from an intuitive management console that enables you to ensure project success.

"Migrator for Notes to Exchange delivered the throughput we needed to complete the migration on time. We were getting only 11–15MB/hour per workstation with our first provider, but over 1GB/hour with each Migrator for Notes to Exchange workstation."

Andrew Buker, director of technical services, University of Nebraska Omaha

Comprehensive migration

BENEFITS:

- Ensures a ZeroIMPACT migration for end users, the help desk and the bottom line
- Simplifies the migration with reporting, scheduling and automation, enabling IT to ensure project success
- Lowers support and maintenance costs by eliminating or reducing Notes infrastructure faster than you thought possible
- Comes backed by an experienced vendor with a track record of successful migrations, a vast partner ecosystem and award-winning, 24x7 global support

SYSTEM REQUIREMENTS

DOMINO SERVER(S)

IBM Domino version 6.x,
7.0.0–7.0.4, 8.0.0–8.0.2,
8.5.0–8.5.3, 9.0.0–9.0.1

EXCHANGE SERVER(S)

Exchange 2016, 2013,
2010, Office 365

SUPPORTED OPERATING SYSTEMS

Windows Server 2012 or R2,
Windows 8, Windows Server
2008 SP2 or R2, Windows 7

Note: This list shows only the most basic requirements. For a complete list of system requirements, visit quest.com/products/migrator-for-notes-to-exchange

FEATURES

Finish fast

Slash costs by up to 60 percent with a fast and efficient transition to Office 365 and Exchange. Migrator for Notes to Exchange includes an advanced, multi-threaded engine that enables you to move email and calendar data more than three times faster than other solutions, and with fewer resources than you thought possible. You can also run multiple migration consoles to further increase scalability and avoid network bottlenecks.

Advanced automation

You can monitor your project status from a central console, use templates to ensure consistent results on each migration job and take action when needed with detailed result reports.

Anytime scheduling

Migrator for Notes to Exchange automates administrative tasks, such as mailbox creation and mail routing, to reduce IT work time. You can also schedule migration jobs to run when they least impact network bandwidth, such as at night or during the weekend.

Self-service desktop migrator

End users or administrators can silently migrate personal data without data loss (including archived and encrypted messages) to Exchange, personal archives or Outlook personal stores. You can also avoid network bottlenecks by

staggering scheduled migrations and limiting the number of users migrating.

Seamless coexistence

You can also use Coexistence Manager for Notes to deliver directory, free/busy and calendar coexistence between Notes and Office 365 and Exchange. This ensures users on both platforms remain productive throughout the entire migration.

Know, then go

Perform a pre-migration assessment of your Notes and Domino environment to plan for your project and mitigate risk. MessageStats Report Pack for Lotus Notes can be used to easily identify unused mailboxes, encrypted content, shared folders, active mail and other critical data, so you can plan a faster and less expensive migration.

ABOUT QUEST SOFTWARE

Quest Software creates technology and solutions that build the foundation for enterprise AI. Focused on data management and governance, cybersecurity and platform modernization, Quest helps organizations address their most pressing challenges and make the promise of AI a reality. Around the globe, more than 45,000 companies including over 90% of the Fortune 500 count on Quest Software. For more information, visit www.quest.com or follow Quest Software on X (formerly Twitter) and LinkedIn.
