Quest Identity Modernization Suites: the foundation for AI-ready Microsoft platforms

Are your Microsoft platforms ready for AI?

AI is changing the game — and making it harder than ever to manage and protect legacy on-prem identities like Active Directory. AD is 25 years old, deployments are riddled with technical debt, and there's a growing skill shortage. Organizations are struggling to maintain these environments, and now AI-driven threats are compounding the challenge. As a result, modernizing identity is no longer optional; it's imperative.

Why? Because trusted identities are the foundation for trusted data and, ultimately, trusted AI. Your identities — including humans, applications, service accounts, and AI agents — are the keys to your data. If those identities aren't secure, neither is your data. Identities remain the #1 target for cyberattacks, and when they're compromised, everything downstream is at risk.

That's why Quest Identity Modernization Suites are critical. Modernizing your identity infrastructure isn't just about moving data — it's about doing so securely, reliably, and with resilience built in. Quest delivers the only end-to-end migration and modernization platform that combines migration with security, auditing, and backup & recovery. This comprehensive approach reduces risk as you move from legacy on-prem environments to Microsoft 365 and Entra ID, laying the foundation for Zero Trust and AI-driven transformation.

With 25+ years of proven expertise and the first solution for Microsoft 365 and Entra ID migration to earn Microsoft 365 Certification, Quest ensures your migration is seamless, secure, and future-ready. Indeed, 76% of Quest migration customers rank security as their top priority for identity modernization, because true AI readiness starts with a security-first strategy. Quest starts every migration with a risk assessment and a secure backup and recovery plan — because when operational resilience is on the line, failure isn't an option.

“We were not buying tools; we were buying knowledge. The people from Quest were highly engaged, supportive and knowledgeable, and they had already performed a massive number of large migrations like ours. We saw that they would be able to support us from day one through the entire project.”

Sylvain Cloutier, Vice President of Service Delivery,
AtkinsRéalis

Comprehensive identity modernization — tailored to your needs

Quest supports your identity modernization journey with solutions purpose-built to reduce risk, simplify consolidation, and strengthen security. Our Identity Modernization Suites combine industry-leading migration tools with essential safeguards like pre-migration risk assessment and secure backup and recovery, delivered at three levels to match your organization's requirements: Base, Plus, and Premium. accounts, and AI agents — are the keys to your data. If those identities aren't secure, neither is your data. Identities remain the #1 target for cyberattacks, and when they're compromised, everything downstream is at risk.

Base Suite

Start your modernization journey with essential migration and protection capabilities:

- Active Directory and device migration for a secure, seamless move to Microsoft 365 and Entra ID
- Pre-migration assessment and security reporting with our pre-built AD Modernization Report Pack
- Backup & recovery to ensure resilience and rapid restoration before, during, and after migration

Plus Suite

Add advanced auditing and policy protection for greater control and compliance:

- All Base Suite features
- Audit & compliance for real-time visibility and threat monitoring
- GPO management and protection to enforce change control and prevent misconfigurations

Premium Suite

Achieve full cyber resilience with advanced security and AI-powered threat defense:

- All Plus Suite features
- Cloud-native audit and compliance for hybrid visibility
- Tier 0 discovery and protection to secure privileged accounts
- AI-powered ITDR for AD & Entra ID to detect and respond to identity-based threats
- Shields Up attack containment and disruption for proactive defense against ransomware and advanced attacks

Add-on service: Application Migration Assessment

Pair any Quest Identity Modernization Suite with our [Application Migration Assessment](#) service for detailed insights into your application ecosystem to round out your migration strategy:

- Comprehensive application discovery
- Dependency mapping
- Actionable recommendations: rehome, refactor, replace, or retire
