Quest QoreStor – Now infused with VeeamEnhanced Data Mover

Faster backups. Smarter storage. Effortless integration.

Quest QoreStor is proud to be part of the [Veeam Alliance Technical Program](#), a strategic collaboration that brings advanced capabilities to our solution, making it even more powerful and efficient for your data protection needs.

Through this program, Veeam's Enhanced Data Mover (EDM) technology is now infused directly into our QoreStor solution, optimizing how data is backed up and stored. Now you can transform backup workflows with blazing-fast performance, reduce network strain, and offer seamless compatibility, helping your organization save time, resources, and money.

What's in it for you?

1. Lightning-fast backup and restore times

Say goodbye to long backup windows. Veeam EDM embedded in QoreStor boosts data transfer speeds and ensures your backups are completed faster than ever, keeping your critical systems running smoothly.

Benefits

- Faster backup speeds
- Immutable ransomware protection
- Reduced network load
- Simple integration with intuitive deployment
- Gain 60% additional deduplication rate

2. Security and ransomware resilience

QoreStor 7.5 seamlessly integrates with Veeam's EDM, as a hardened repository, adding protection with immutability. Alongside key capabilities such as AI anomaly detection and encryption, your data is safeguarded against ransomware and other threats.

3. Optimized network resources

Why overload your network when you don't have to? This integration minimizes network traffic by processing data directly on QoreStor's platform, freeing up bandwidth for other essential tasks.

4. Smarter storage utilization

Maximize your storage investments with advanced deduplication and data reduction capabilities. QoreStor and Veeam EDM work together to help you store more data in less space without compromising performance, improving Veeam backup deduplication rates up to 60%.

5. Hassle-free integration

Deploy with confidence. Directly leveraging Veeam's repository workflow, simply add QoreStor as a Linux hardened repository. Seamlessly reducing deployment time and complexity.

Why choose QoreStor infused with Veeam EDM?

- **Reliability** — Ensure fast, consistent backups – every time
- **Scalability** — Control storage consumption for growing backup data volumes– add 60% more on top of Veeam deduplication
- **Security** — Gain key ransomware protection features such as immutability, AI anomaly detection and encryption

Your challenges, solved

Using QoreStor infused with Veeam EDM technology, you can count on backup processes that are faster, more efficient, secure and tailored to your needs. Discover how we're pushing the boundaries of what's possible in data protection, so you can focus on what matters most: growing your business.

About Quest Software

Quest Software creates technology and solutions that build the foundation for enterprise AI. Focused on data management and governance, cybersecurity and platform modernization, Quest helps organizations address their most pressing challenges and make the promise of AI a reality. Around the globe, more than 45,000 companies including over 90% of the Fortune 500 count on Quest Software. For more information, visit www.quest.com or follow Quest Software on [X \(formerly Twitter\)](#) and [LinkedIn](#).
