

Total Petrochemicals migrates from Notes to SharePoint with no data loss

Total Petrochemicals is one of the largest publicly traded oil and gas companies in the world. Total engages in all aspects of the petroleum industry, from oil and gas exploration to development and production, to refining, marketing and shipping of crude oil and petroleum products. The company is also helping to develop renewable energies, such as photovoltaic power, marine energy and second-generation biofuels.

When Total needed to migrate applications and content from IBM Notes to SharePoint without data loss or business interruption, it turned to Quest®.

Total embarked on a global project to migrate from Notes to a Microsoft environment. In particular, the company needed to smoothly migrate a variety of

Notes applications to SharePoint without data loss or user disruption.

Total's IT staff determined that they needed an easy-to-use and reliable migration tool. Paul Wansart, domain manager at Total, said, "We had two main selection criteria: easy configuration for the migration of application data, and the ability to replay the migration scenarios as many times as needed to ensure good results."

A SINGLE VENDOR FOR A COMPLETE MIGRATION

Migrator for Notes to SharePoint enables organizations to accurately analyze their Notes application content and securely migrate it to SharePoint without data loss. It also offers both automated migration of standard Notes applications and advanced migration of complex or custom Notes applications.

"Migrator for Notes to SharePoint is mature, stable and extremely easy to use. We were able to migrate more than 250 applications with no interruption to users or other problems. Moreover, this solution does not require much human intervention, which saved us a great deal of time and money."

Paul Wansart
Domain Manager, JIS&T Business Systems Integration, Total Petrochemicals

BUSINESS NEED

Total Petrochemicals needed to migrate from IBM® Notes® to a new Microsoft environment without data loss or business disruption.

SOLUTION

The company implemented Migrator for Notes to SharePoint in order to quickly migrate to the new environment.

BENEFITS

- Migrated Notes content to SharePoint without data loss or business interruption
- Delivered significant savings through automation

SOLUTIONS AT A GLANCE

- Microsoft platform migration and consolidation

“We studied the entire market to find tools that could simplify our migration project,” explained Wansart. “Four candidates were considered, but ultimately we chose Migrator for Notes to SharePoint because of its security, flexibility and ease of use.”

A SIMPLE, SECURE MIGRATION

Using Migrator for Notes to SharePoint, Total was able to efficiently and securely migrate its Notes applications and content to SharePoint. “Migrator for Notes to SharePoint is mature, stable and extremely easy to use,” commented Wansart. “We were able to migrate more than 250 applications with no interruption to users or other problems. Moreover, this solution does not require much human intervention, which saved us a great deal of time and money.”
